

# Home Learning

Welcome to a new week of online learning! Here is the weekly agenda for each day this week. Please don't forget to share your hard work with your teacher! They want to see all of the amazing things you are doing at home! Remember that you **DO NOT** need to print anything if you are unable. Everything can be done in a notebook or on a piece of paper. Your teacher will check in with you on zoom every Monday to get you ready for the week and do some math activities. You'll meet again on Friday for a quick meeting to go over any questions you may have and to celebrate the work you've done that week. Don't forget you can send your teacher a Remind message or an email anytime.

# Area of Squares and Rectangles

What is the area of this rectangle?

Use the formula  $A = \ell \times w$ :

$$A = 8 \times 5$$

$$A = 40$$

The area is 40 square feet.

What is the area of this figure?

You can draw segments to divide the figure into rectangles. Then find the area of each rectangle and add.

Rectangle A	Rectangle B
$A = \ell \times w$	$A = \ell \times w$
$A = 4 \times 4$	$A = 4 \times 6$
$= 16$	$= 24$

$16 + 24 = 40$ , so the area of the original figure is 40 square meters.

Find the area of each figure.

3. **Reason** The area of a rectangle is 56 square inches.

The width of the rectangle is 7 in. What is the length? \_\_\_\_\_

# Area of Squares and Rectangles

Find the area of each figure.

5. What is the area of one bedroom?
- 

6. What is the area of the garage?
- 

7. Which is the area of a rectangle with a length of 6 cm and a width of 9 cm?

**A** 63 square cm    **B** 54 square cm    **C** 45 square cm    **D** 36 square cm

8. **Writing to Explain** Explain how you would find the length of one side of a square if the area is 16 square units.

# Area of an Irregular Shape

To find the area of an irregular shape made of two or more rectangles, cut the shape into two or more parts and add the area of each part.

**Area of Rectangle 1:**

$$A = l \times w$$

$$A = 4 \times 3$$

$$A = 12 \text{ m}^2$$

**Area of Rectangle 2:**

$$A = l \times w$$

$$A = 5 \times 3$$

$$A = 15 \text{ m}^2$$

**Total Area:**

$$A = 12 \text{ m}^2 + 15 \text{ m}^2$$

$$A = 27 \text{ m}^2$$

Find the area of each shape. Include units in your answer.
